Professional summary

Strategic, hands-on Senior Product Designer with a fine arts background and a passion for crafting intuitive, visually rich digital experiences.

Proven ability to lead projects from ambiguous problem spaces to polished UI, using user research, AI-enhanced analysis, rapid prototyping, and iteration. Brings a deep understanding of complex systems and logic, particularly in the IAQ (Indoor Air Quality), hardware SaaS, education, and fintech sectors.

Excels at cross-functional collaboration with engineering, marketing, leadership, and support, to ship thoughtful products that balance user needs with business goals. Known for creative problem-solving, efficiency under pressure, and delivering high-impact solutions with limited resources and tight timelines.

Strong at shifting between high-level product strategy and fine-grain interaction details, the kind that make or break the end-user experience.

Core Skills

Product Strategy, UX Research, User Experience (UX), AI-assisted User Research, Rapid Prototyping, Usability Testing, UI/Visual Design, Design Systems, Figma, Cross-functional Collaboration, Mobile Applications, Android, iOS, Web, User Testing, Wireframing, Presentations, Mobile Interface Design, Human Interaction, Presentation, Storytelling, Adaptability.

Professional Experience:

Think Tank Training Centre, Senior Product Designer, May 2025 - December 2025

- Applied a user-centered design approach to translate complex product concepts into end-to-end user flows, wireframes, mockups, and interactive prototypes supporting core workflows for multiple personas:
 - **Students:** tracking online learning progress, schedules, lessons, self-paced study, group sessions, and access to support and mentorship;
 - **Faculty:** grading student work, facilitating group calls, delivering feedback, and managing mentorship interactions;
 - **Administrators:** software distribution, learning content management, and platform operations and maintenance.
- Planned and conducted user research activities, including usability testing and stakeholder interviews; synthesized qualitative and quantitative feedback into

actionable insights and design iterations aligned with both business objectives and user needs.

- Collaborated closely with Product Managers and cross-functional stakeholders to define UX deliverables, coordinate timelines and milestones, and deliver design artifacts (prototypes, interaction specifications, and accessibility updates), ensuring efficient handoffs and predictable delivery under aggressive timelines.
- Integrated AI-assisted research, ideation, and content generation into the design workflow to validate design patterns, explore alternative user-flow solutions, and accelerate decision-making.
- Ensured accessibility compliance and optimal usability across the product by applying inclusive design principles and usability best practices.

HAVEN IAQ, UI/UX/Product Designer, March 2021-April 2025

- Led end-to-end redesign of HAVEN's dashboard and drilldown pages, from initial user interviews and competitor benchmarking to polished, production-ready UI, improving user experience and engagement by 30%.
- Took ownership of the design process from research to execution of multiple products across mobile and desktop platforms, tailored to two user audiences.
- Leveraged AI tools to identify user pain points and synthesize insights across interviews, surveys, and internal feedback.
- Delivered high-fidelity prototypes and ran multiple usability test rounds, informing rapid design iterations for multiple products.
- Strengthened consistency and efficiency by implementing and scaling HAVEN's design system, creating documentation and guidelines for best design practices.
- Worked closely with engineers and achieved a reduction in HAVEN device installation time from 35 to 15 minutes.
- Demonstrated exceptional ability to translate business goals and ideas into an intuitive end-user experience.
- Led and planned end-to-end design of multiple installation templates that accommodated various device configurations, involved developers and other team members early in the process, and significantly increased user engagement and HAVEN device sales.
- Improved the flow for HAVEN devices installation, which reduced the number of abandoned installations by 10%.

Freelance projects, September 2020 - February 2021

Walletifai, UI/UX Designer

- Joined this fintech startup's multidisciplinary team to work on building an innovative personal financial management app from scratch.
- Conducted quantitative and qualitative user research and market analysis.
- Performed affinity diagramming sessions with the design team to synthesize findings.

- Documented and presented key findings to the team and stakeholders.
- Created personas, user stories, user flows, low and high-fidelity wireframes.
- Used interactive prototypes to present the design to stakeholders.
- Organized and conducted user testing sessions to verify each design iteration.
- Created brand identity and design system in Figma.
- Created accessible mobile user interfaces using Figma.
- Communicated with the team of developers to ensure pixel-perfect implementation.
- Supported marketing and growth teams to increase engagement via social media platforms.

Education

Bachelor of Arts, study towards Master's Degree
Yanka Kupala State University of Grodno
2005-2010
