Professional summary

Strategic, hands-on Senior Product Designer with a fine arts background and a passion for crafting intuitive, visually rich digital experiences.

Proven ability to lead projects from ambiguous problem spaces to polished UI, using user research, AI-enhanced analysis, rapid prototyping, and iteration. Brings a deep understanding of complex systems and logic, particularly in the IAQ (Indoor Air Quality) and fintech sectors.

Excels at cross-functional collaboration with engineering, marketing, leadership, and support, to ship thoughtful products that balance user needs with business goals. Known for creative problem-solving, efficiency under pressure, and delivering high-impact solutions with limited resources and tight timelines.

Strong at shifting between high-level product strategy and fine-grain interaction details, the kind that make or break the end-user experience.

Core Skills

Product Strategy, UX Research, User Experience (UX), AI-assisted User Research, Rapid Prototyping, Usability testing, UI/Visual Design, Design Systems, Figma, Cross-functional Collaboration, Mobile Applications, User Testing, Wireframing, Presentations, Mobile Interface Design, Human Interaction, Presentation

Professional Experience:

Think Tank Training Centre, Senior Product Designer, May 2025 - December 2025

- Taken a user-centered approach in translating concepts into user flows, wireframes, mockups, and prototypes that encompasses workflows for:
 - Students—to keep track of their online learning progress, their schedule, lessons, self-paced studying and group meetings, support and mentorship;
 - Faculty—student's work grading, group calls, feedback and mentorship;
 - Admins—software distribution, managing learning content and housekeeping.
- Facilitated user testing and interviews, consolidated feedback into actionable themes, and iterated on the designs to satisfy business and user needs.
- Coordinated timelines and milestones with Product Manager and internal stakeholder for UX artifacts, such as prototypes, interaction specs, and accessibility

adjustments, ensuring smooth handoffs and predictable delivery under extremely tight deadlines.

- Incorporated AI-assisted research, ideation, and content generation into your design workflow, using AI tools to validate patterns, and explore alternative user-flow solutions.
- Ensured accessibility and optimal usability across the whole product.

HAVEN IAQ, UI/UX/Product Designer, March 2021-April 2025

- Led end-to-end redesign of HAVEN's dashboard and drilldown pages, from initial user interviews and competitor benchmarking to polished, production-ready UI, improving user experience and engagement by 30%.
- Took ownership of the design process from research to execution of multiple products across mobile and desktop platforms, tailored to two user audiences.
- Leveraged AI tools to identify user pain points and synthesize insights across interviews, surveys, and internal feedback.
- Delivered high-fidelity prototypes and ran multiple usability test rounds, informing rapid design iterations for multiple products.
- Strengthened consistency and efficiency by implementing and scaling HAVEN's design system, creating documentation and guidelines for best design practices.
- Worked closely with engineers and achieved a reduction in HAVEN device installation time from 35 to 15 minutes.
- Demonstrated exceptional ability to translate business goals and ideas into an intuitive end-user experience.
- Led and planned end-to-end design of multiple installation templates that accommodated various device configurations, involved developers and other team members early in the process, and significantly increased user engagement and HAVEN device sales.
- Improved the flow for HAVEN devices installation, which reduced the number of abandoned installations by 10%.

Freelance projects, September 2020 - February 2021

Walletifai, UI/UX Designer

Joined this fintech startup's multidisciplinary team to work on building an innovative personal financial management app from scratch.

Conducted quantitative and qualitative user research and market analysis.

Performed affinity diagramming sessions with the design team to synthesize findings.

Documented and presented key findings to the team and stakeholders.

Created personas, user stories, user flows, low and high fidelity wireframes.

Used interactive prototypes to present the design to stakeholders.

Organized and conducted user testing sessions to verify each design iteration.

Created brand identity and design system in Figma.

Created accessible mobile user interfaces using Figma.

Communicated with the team of developers to ensure pixel-perfect implementation;
Supported marketing and growth teams to increase engagement via social media platforms.

Education

Bachelor of Arts, study towards Master's Degree
Yanka Kupala State University of Grodno
2005-2010
